# A young company built on **proven** experience

NRG Reo is a fast-growing steel fixing and civil works contractor based in Queensland, operating nationally across city and regional projects. Although young as a company, our team brings more than 30 years of combined experience in complex mining, tunnelling, oil and gas and high-rise construction.

We pride ourselves on rapid mobilisation, uncompromising safety and a track record of delivering projects on time and to the highest quality standards for Tier 1 builders and developers.

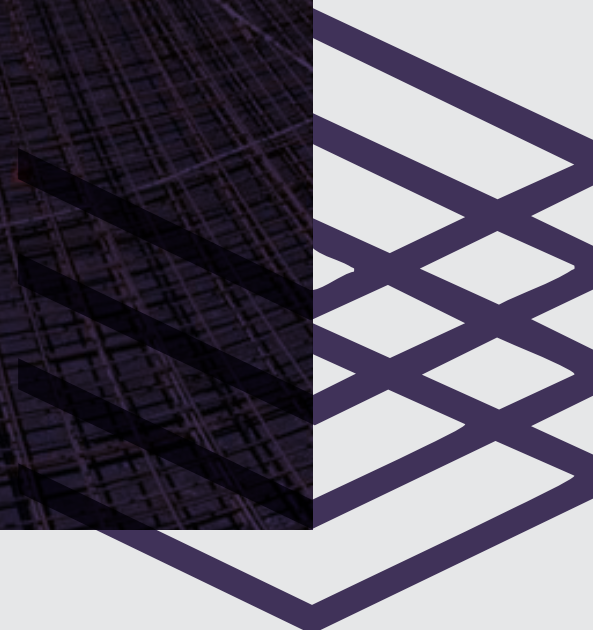

From four workers to over 60 in just three years, our business growth reflects client trust, strong referrals and consistent delivery of high-quality results.

# Experience-driven outcomes, every project

At NRG Reo, we exist to provide steel fixing and civil construction support that clients can rely on, every time. We combine decades of project expertise with a young company's drive and adaptability. Our clients benefit from safe worksites, responsive teams and the confidence of working with a contractor who consistently delivers on program and budget .

## Our people bring Tier 1 expertise

We employ experienced tradespeople and leading hands from mining, tunnelling and gas projects, giving you access to crews who understand complex project requirements.

## We deliver on time, every time

Our proven record of meeting deadlines means you save time and avoid costly delays, supported by our culture of accountability and owner-led leadership.

## Safety and compliance are non-negotiable

We live and breathe Tier 1 safety standards, with fit-for-work, medically cleared and drug-free crews who proactively engage with site safety committees.

## Flexibility to mobilise anywhere

Whether in city high-rises or remote FIFO projects, we can rapidly deploy qualified teams that integrate seamlessly with your project needs.

**For safe, reliable**  
**project delivery**  
**backed by people**  
**who know major**  
**works inside out.**

# Specialists in steel fixing and civil works

We provide end-to-end steel fixing, civil construction support and skilled labour supply across mining, tunnelling, high-rise and infrastructure projects. Our services are designed to help Tier 1 builders and developers reduce risk, maintain safety compliance and deliver on program.

With proven systems and adaptable crews, we deliver quality results that support your project goals.

Our services are built around one goal: *helping clients deliver safe, efficient projects with zero compromise on quality.*

## Steel Fixing Across All Sectors

We deliver high-quality steel installation for high-rise, civil, mining, gas plants, tunnelling and large infrastructure projects, ensuring structures are safe, compliant and built to last.

## Project Delivery and Compliance

We manage site compliance, safety paperwork and QA documentation, removing headaches and ensuring projects meet Tier 1 standards from start to finish.

## Civil Construction Support

Our teams provide specialised support for tunnelling, bore mills, desalination plants, roadworks and major infrastructure, giving clients confidence in complex and high-risk environments.

## FIFO and Remote Mobilisation

We offer flexible deployment options for FIFO and regional projects, helping clients resource projects efficiently while supporting workers' lifestyle needs.

## Labour Supply For Major Projects

With a workforce of 50–60, we supply skilled and safety-compliant crews for steel fixing and civil works, mobilised quickly to meet tight deadlines.

## Safety and Quality Assurance

Our culture prioritises safety, with site-ready, drug-free workers and strong rapport with safety committees, ensuring smooth approvals and safe project execution.

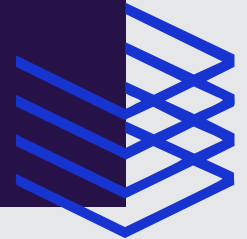

# Serving diverse projects across Australia

NRG Reo delivers steel fixing and civil support across multiple industries, from city high-rises to remote mining infrastructure. We understand the unique challenges of each sector and tailor our approach to deliver safe, efficient and cost-effective results.

Our adaptability ensures clients benefit from proven expertise in high-risk environments and complex projects nationwide.

## Industries we serve:

- Mining
- Tunnelling
- High-rise buildings
- Civil construction
- Gas plants
- Roads and infrastructure
- Utilities and desalination plants
- Large-scale government projects  
*(e.g. Snowy Hydro, Olympics)*

### Mining & Resources

We mobilise experienced teams to support mining infrastructure, processing plants and new developments, ensuring reliable steel fixing in challenging environments.

### Tunnelling & Civil Works

Our tunnelling and bore mill expertise helps clients meet complex engineering demands with crews who understand confined space and high-risk safety standards.

### High-Rise Construction

We provide expert steel fixing for towers and city infrastructure, delivering quality, compliance and certainty in high-pressure urban environments.

### Infrastructure & Utilities

From desalination plants to road and Olympic-related works, we help clients deliver major public infrastructure projects on time and to Tier 1 standards.

### Offsite Prefabrication Yard

Our prefab yard assembles reinforcement off-site for efficient delivery, improving quality, reducing congestion, saving time, and ensuring program certainty.

# Building careers, communities and opportunities

At NRG Reo, we believe success is measured not just in projects delivered, but in people supported. We invest heavily in apprenticeships and traineeships, ensuring young workers gain hands-on experience and mentoring from senior tradespeople. We provide both city-based and FIFO roles to suit lifestyle goals. By supporting schools and training pathways, we build strong communities while sustaining long-term industry growth.

## ACCREDITATIONS

# Certified to deliver safely and reliably

Our commitment to safety and compliance is supported by accreditations and industry certifications that meet Tier 1 requirements. These standards ensure clients can engage us with confidence, knowing our crews and systems are aligned with best practice in quality, safety and project delivery.

LICENCE 15508557

# Steel Fixing - ARC by Graya

## High-end multi-residential development

ARC by Graya is a high-end, multi-residential development in Brisbane. Our steel fixing team is delivering reinforcement services across complex slabs, transfer beams, and shear walls within an accelerated construction program.

### The Challenge

The project demanded advanced bar bending for curved, non-linear slabs and rapid mobilisation to meet a revised, fast-tracked schedule—all while maintaining structural compliance and seamless coordination with other trades.

### Our Solution

We scaled resources, staged prefabrication, and coordinated steel deliveries in line with pour sequencing. Close collaboration with engineers and supervisors ensured accuracy, compliance, and integration across the site.

### The Result

Over 400 tonnes of reinforcement delivered with zero rework. Our team maintained pace with the accelerated program, achieving full compliance and supporting timely structural completion.

# Tomkins Commercial

## Luxury Residential Apartments

The Rivello by Tomkins is a landmark luxury residential project in Brisbane's riverside precinct. NRG Reo delivered reinforcement works across major structural elements, including slabs, cores, and transfer structures.

### The Challenge

NRG Reo was engaged to take over steel fixing mid-project, requiring seamless integration into an active site while maintaining program momentum, quality standards, and safety performance.

### Our Solution

We embedded into the Tomkins team through regular coordination, responsive adaptation to design changes, and proactive communication. This ensured reinforcement works aligned with pour schedules and site requirements.

### The Result

NRG Reo delivered all steel fixing works to spec with zero non-conformances, maintained strong safety records, and supported Tomkins in meeting critical construction milestones.
